

Kasia Izdebska is the Senior Manager of Enterprise Innovation at OPG, the company's first enterprise-wide innovation department that supports both Renewable Generation and Nuclear lines of business. She joined OPG in 2010 and has also worked at OPG X-Lab as an electrical hardware designer for various wireless devices. Kasia holds several patents developed by her team and is a proud recipient of the oneOPG Award, an annual recognition given to employees who exemplify a culture of high performance and creativity.

She is also a strong supporter of young women in Canada's STEM (science, technology, engineering, and mathematics) program and mentors many young professionals to help them achieve their goals.

Kasia earned her Bachelor of Electrical Engineering from McMaster University, where she was also a member of the varsity rowing team. She holds a P. Eng. license.
